## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to a method of inhibiting cell function with an antibody, classified in class 424, subclass 130.1.
  - II. Claims 11-13, drawn to a drug comprising an antibody, classified in class 530, subclass 387.1.
  - III. Claim 14, drawn to a method of detection with an antibody in vitro, classified in class 436, subclass 500.

The inventions are distinct, each from the other because of the following reasons:

2. The invention of group I and III differ one from the other because they methods which have distinct methodological steps, have different purposes, and have distinct outcomes.
3. Inventions II and I, III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method can be accomplished using an antisense nucleotide sequence of the target.

Art Unit: 1642

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
